GA_T2_Project2_Restaurant_Reservation_App_User_Stories

User Stories

MVP

1. As a hostess, I would like to make a reservation for customer(s) so that I can keep track of where customer is located in the restaurant and know whether restaurant capacity has been reached.
2. As a hostess, I would like to know how many seats are available at each table so that I can seat an entire party at one table or know whether I need to move multiple tables together.
3. As a hostess, I would like to know customer information so that I can contact him/her and confirm the reservation in advance.
4. As a hostess, I would like to know which server is assigned to a table so I can keep track of how many customers a server is providing service to and to know who to contact if a customer wants his/her server.
